ICT HARDWARE AND INFRASTRUCTURE COMPANIES

Compared to each of the other industry segments, the ICT Hardware and Infrastructure sector was the hardest hit in 2009, as combined revenues for the category fell 21 per cent to \$28.74 billion. Sector leaders did not fair any better, with the category's Top 25 companies generating \$27.91 billion in sales, down 22 per cent compared to 2008. Despite the overall decline in category revenues, several companies did experience positive growth in 2009. Leading all firms with 84 per cent year-over-year growth, RIM surged past long-time sector leaders Nortel Networks and Celestica (down 59 per cent and 22 percent, respectively.), to land in the number one spot in 2009.

Since first appearing on the Branham300 in 2007, Woodbridge, Ont.-based RuggedCom has produced annual growth of at least 50 per cent. Most recently, the provider of communications networking equipment designed for harsh environments increased revenues by 54 per cent to approximately \$63.19 million, landing in the 22 position in 2009.

After dropping off the Top 25 ICT Hardware and Infrastructure listing in 2008, Sandvine turned

things around in 2009, increasing revenues by 35 per cent to generate approximately \$68.85 million and rank number 20 on this year's listing. Rutter, headquartered in St. John's, Nfld., followed closely with 28 per cent year-over-year growth. However, halfway through its fiscal year, the manufacturer and engineer of radar signal processing technology disposed of its controls and automation business for just less than \$23 million, contributing to its slide to the 25 position on this year's listing.

IT PROFESSIONAL SERVICES

The IT Professional Services category realized the sharpest increase in revenues compared to last year, as the 72 companies appearing on the Top 250 this year combined to generate \$10.32 billion in revenues, up 21 per cent compared to 2008. The Top 25 companies within this category also produced a considerable increase compared to last year's leaders, increasing combined revenues by 20 per cent to \$9.41 billion in 2009.

CGI is the leading IT Professional Services company in Canada again in 2009. Not immune to the economic factors that affected all companies, CGI was able to increase its presence in the government,

healthcare, and financial services spaces, offsetting declines in the telecommunications, utilities and manufacturing verticals. As a result of its successful shift in vertical focus, the IT and business process services provider was able to generate \$3.83 billion in revenues in 2009, up three per cent compared to 2008.

For the remaining companies comprising the top five, 2009 proved to be a difficult year, as fifth-ranked Compugen was the only company in the group to realize positive, albeit modest, growth.

However, several companies on the rest of the list experienced considerable growth in 2009. Cyberplex realized a significant increase in demand for its Web advertising solutions in American and international markets, leading to an estimated 100 per cent increase in sales in 2009 to \$114.75 million. OnX Enterprise Solutions followed with 47 per cent year-over-year growth to reach \$156.43 million and the number 12 position on this year's listing. The only other company to experience year-over-year growth in excess of 30 per cent in 2009 was Groupe GFI Solutions. It surpassed the \$100 million mark in revenues for the first time in company history, generating approximately \$107 million in 2009, up 34 per cent compared to the previous year.
